ADVENTURE IN FALL RACE

Speedway Officials Ask for More Cars in Turkey Day Event

great is the interest in the Thanksgiving Day race on the Beverly Hills Speedway at this early date, that Secretary-Manager A. M. Young of the Los Angeles Speedway Association has wired the contest board of the American Automobile Association to raise the limit of eight placed upon entries to twenty, placing a record list of drivers on the starting flag when the Turkey Day date falls. This was an announcement made by Young in his offices yesterday.

at California is getting behind in automobile racing sport with a view to establishing this State as the best racing center in the world. evidenced in this latest move, indicates the record crowd, by making reservations for the stands and boxes, will be filled with a rare variety of thrilling sport of speed.

Young but recently returned from the northern part of the country where, attending the Cotati meet, he was in touch with the drivers and the entry has grown to such proportions that the wire to the contest board, which governs all automobile racing, followed.

the northern meet, Los Angeles has become the mecca for of the drivers who will compete in the Thanksgiving Day race, for a distance of 250 miles, which is the final event of the season. Among the drivers in Los Angeles at the pre-race time are Tommy Milton, who an unofficial world's record Tuesday afternoon, turning a and a quarter lap on the early bowl at the rate of 125 miles per hour; Roscoe Sables, who you've drive one of the new Durantials, which will make their first appearance in the Thanksgiving event here; Bennett Hill, whose Hill special showed remarkable good speed in the Cotati tests; Frank Elliott, winner of those races; Art Klein, driving the fast Frontenac; the oldster, Ralph De Palma, and several others.

Milton's performance on the track here proved the Beverly Hills to be the fastest in the country and, showing that the track stand such terrific speed, is a guarantee that the 183-cubic inch little, which are faster than any competitive racing jobs that have been built, is the basis for sending that records will fall and left as the cars go roaring through space.

Attention Ford Owners!

Ford parts, like almost everything else worth while, are counterfeited. Imitation parts are manufactured to **SELL** at the highest possible rate of profit and the grades of steel used are consequently not the same high quality, specially heat-treated alloy steels specified in Ford formulas for the manufacture of **GENUINE FORD PARTS**.

Don't be misled—Insist upon **GENUINE FORD PARTS** made by the Ford Motor Company. By so doing you will get from 35 to 100 per cent more wear from them, and you will pay the lowest possible cost—the same everywhere.

50% OF GENUINE FORD PARTS RETAIL FOR LESS THAN 10c EACH

JEWETT CARS WIN PRAISE

Several Stock Machines Are Put Over Sharp Hills in Try-Outs

Word that several stock Jewett sixes, in different localities, had tried and conquered every notable hill test in Northern California in a one-day test staged under the direction of the Northern California Paige and Jewett factory branch was received by a highly enthusiastic sales organization of the Paige Company of Southern California.

Requests that were sent out by the parent organization one day last week resulted in the tests.

The first test was made in San Francisco, on the famous "Red Brick" or demonstration hill, Francisco street. From a standing start at the foot of the sharp incline the climb over the top was made without shifting from high gear and at a speed of 12 miles per hour. Acceleration trials, held subsequently with the same car, showed that the car accelerated from 5 to 25 miles per hour in 7 seconds and from 5 to 40 miles per hour in fifteen seconds.

The above report was particularly pleasing to B. M. Torrens, local distributor of the Jewett, whose salesrooms are located at 112 South Catalina street, Redondo, and who has sold several Jewetts on the strength of their wonderful hill-climbing qualities.

Long Beach Wins In Economy Test

A low-cost four-hour run was made last Tuesday from Los Angeles to Arrowhead Lake and return in which nine Studebaker big six touring cars contested. These cars were entered by as many Studebaker dealers of Southern California and the prize for lowest cost of fuel and oil on the round trip went to the Long Beach dealer, whose bill for fuel and lubricant to refill his tanks at the finish was \$2.27, with an average cost for all nine cars of \$2.59.

The contest was organized at the suggestion of the Lake Arrowhead Genuine Ford and Fordson Company to demonstrate the economy of mountain travel with a high-powered seven-passenger car. A time limit of four hours was set for the trip each way. Going up it is eighty-five miles to the Arrowhead village, while the return trip around the north shore of the lake is ninety-three miles. This gave 178 for the round trip and an average of 19.77 miles per gallon for the winning car with 15.86 miles per gallon. As no coasting was permitted by the very strict rules laid down by L. G. Thompson, manager of the contest, the dealers all claimed that it was impossible to show the normal economy of operation as they had to keep their gears in mesh and their motors running except at stops.

When A. W. Maxwell, branch manager for the Studebaker Corporation of America, checked up the oil consumption of the cars as referee of the contest he could find no perceptible lowering of the oil gauge levels so every car was arbitrarily assessed for one pint of cylinder oil.

At the start each car carried a new five-dollar note pasted on the windshield. This was removed at the finish to pay the operating cost and instead of giving the change to the contestants it was placed in the trophy cup and then presented by Florence Vidor to the Salvation Army on behalf of the contestants.

STUDEBAKER MAN FIREFIGHTER

The fire in Moneta that occurred Friday night and which for a time threatened the entire town was subdued largely through the prompt and efficient efforts of the Torrance fire department under the leadership of Ben Hennebrink.

Moneta is unfortunately without firefighting apparatus and Torrance was the first nearby town notified by the telephone operator. Later Redondo was called and later still Inglewood and even Los Angeles, so great was the fear of the Moneta residents that the entire town would be wiped out.

In answering the second alarm Clark E. Seargent, foreman of the Studebaker plant in Redondo, who is head of the volunteer fire department in the beach city, got in touch with the mayor and was given instant permission to take his men to the stricken town. He was on the ground shortly after the arrival of the Torrance ladders and assisted greatly in extinguishing the blaze which was confined to a second-hand store that was almost totally destroyed.

The Brooklands Internationals Grand Prix possibly will prove the biggest event of Europe's racing season, but on account of restrictive sizes America will not be represented.

UNDERINFLATION LOSSES

It has been calculated that the loss to many car owners who do not watch the inflation of their tires may easily reach as high as \$100 in a year and, according to what an expert of the Firestone Service Department says, a tire insufficiently inflated may not only be injurious to the casing and tube, but may affect the delicate mechanism of the car or truck on account of imperfect balance and added jar.

Sudden Speed Ruinous.

To make an automobile go faster, never increase its speed by quick accelerating the engine. This is a bad habit to acquire, because it adds wear and tear not only to the engine, but throughout the entire drive system, including the tires on the rear wheels. As in breaking the speed of the car, so should the speed be increased, and that way is gradually.

FARM VALUATION.

From statistics recently reported on by Firestone experts it is stated that Iowa leads in total value of farm property to the amount of \$8,524,871,000, and that the value of all farm property in the country is \$77,924,100,000.

A Twentieth Century Tragedy Recipe

Take one reckless, natural-born fool. Take two or three big drinks of bad liquor. Add a fast-high-powered motor car. Soak the fool well in liquor, place in the car and let him go. After due time, remove from the wreckage, place in a black, satin-lined box, and garnish with flowers.
